About Me

Aspiring Cyber Security student with hands-on experience in Linux system administration, secure application development, and AI-driven solutions. Strong interest in Machine Learning and Cyber Security, with foundational knowledge of RHEL and Ansible. Eager to explore emerging technologies, continuously enhance technical skill, and contribute to secure and innovative real-world solutions.

Education

Sri Sairam Institute of Technology, Chennai

2023-2027

Bachelor of Engineering in CSE (Cyber Security)

CGPA: 8.64/10

Maharishi Vidya Mandir, Chennai

2023

Higher Secondary Education

86%

Technical Skills

- Python
- SQL
- Cybersecurity Basics
- Linux System Administration
- Ansible Automation
- RHEL
- Machine Learning Basics

Experience

Vectra Technosoft Private Limited

Jan 2025 - Jan 2025

RedHat Networking Intern

Chennai

- Worked on **RHEL Linux** system administration, server configuration, and **Java** web deployment using **Apache Tomcat**.
- Performed user management, package installation, and system maintenance ensuring system stability and security.

Adventure Technology Solutions Private Limited

June 2025 - July 2025

Machine Learning Intern

Chennai

- Built **machine learning models** using real-world datasets with focus on **data preprocessing** and **predictive modeling**.
- Applied feature engineering, model training, and evaluation in end-to-end ML workflow.

Edunet Foundation(AICTE)

May 2025 - June 2025

Cyber Security Intern

Online

- Developed an **LSB steganography system** for secure data hiding in digital images using **Python**.
- Implemented data embedding and extraction techniques using Python, enhancing understanding of information security and data protection methods.

Projects

Smart Plant Diagnosis System

June 2024 – Present

- Developing a **CNN-based** web application for **plant disease detection** in sugarcane, maize, and paddy crops.
- Designed a **multi-module system** featuring **disease prediction**, **fertilizer recommendation**, **crop rotation strategies**, and **agri-shop locator**.

AEGIX – Phishing URL Detection System

July 2026– Present

- Developed a **real-time phishing URL detection system** for **website security analysis** and identifying **malicious or suspicious URLs**.
- Implemented **automated threat analysis**, **scan history management**, and **downloadable security reports** to support **secure web browsing**.

Certifications and Achievements

- **RHCSA** – Red Hat Certified System Administrator
- **Cisco** – Introduction to Cybersecurity & Junior Cybersecurity Analyst Career Path
- **IBM** – Cybersecurity Fundamentals
- **Pixel Play (IEEE Education Week)** – Winner with 1000 cash prize.
